

Restaurant + WhatsApp ordering, one system

Run your whole restaurant from one screen.

QR menu, kitchen display, POS, pay-at-table, stock, reports, WhatsApp ordering and delivery · built for the UAE, in Arabic and English.

Everything the front and back of house need.

Scanly replaces the tangle of a menu app, a POS, a KDS and a delivery tablet with one dashboard.

Guests scan a QR to order and pay, the kitchen sees every ticket, and you keep your own payment gateway · so you pay one simple subscription and nothing per transaction.

Dine-in

QR menu, kitchen display, POS and pay-at-table on one bill.

WhatsApp ordering

Guests order in a WhatsApp chat or inside WhatsApp via a synced catalog.

Back office

Stock, recipe margins, staff hours, reports and delivery zones.

FEATURES

What you get

QR digital menu

Bilingual, with photos, modifiers, allergens and sold-out toggles. Updates the moment you save.

Kitchen display (KDS)

Orders fire to the screen with a sound alert and live prep timers. No paper tickets.

Simple POS

Counter mode for walk-ins and staff orders · cash, card machine or gateway QR, on one bill.

Pay at table

Split the bill, add a tip, get an e-receipt and a review prompt · through your own gateway.

WhatsApp ordering

Order from your menu straight into your WhatsApp chat, or inside WhatsApp via a synced catalog.

Stock & inventory

Ingredients tracked live, auto-deducted on every sale, with low-stock alerts and purchase orders.

CSV ingredient import **PRO**

Load your whole inventory at once from a CSV, with a ready-to-fill template.

Staff hours (HR) **PRO**

Staff clock in and out in a tap, with a duty-hours report per person and a payroll-ready export.

**Scheduled reports** PRO

Pick the sections, add recipients, and a branded PDF arrives automatically at the time you set.

**Delivery zones** PRO

Price delivery by distance with 5/10 km rings, each with a fee and minimum. Beyond range is refused.

**Reports & margins**

Sales, top sellers, recipe cost, gross margin and tips · CSV and branded PDF export.

**Loyalty & promos**

Points, tiers and rewards, coupon codes and happy-hour discounts with smart upsells.

**Delivery aggregators**

Talabat, Noon, Deliveroo and Careem orders flow into the same kitchen display and POS.

**Multi-branch**

One dashboard across every outlet, transfer stock between branches, food-cost % across all.

**POS integration**

Already run Petpooja? Link it so orders push to your POS and the menu stays in sync.

**UAE-ready**

AED-native, FTA-ready VAT/TRN tax invoices, and full Arabic + English (RTL).

FOR ANY SMALL BUSINESS

WhatsApp Ordering · a package of its own

Not a restaurant? Flowers, pharmacy, grocery, bakery, home kitchen · take orders on WhatsApp with a focused CRM: your catalogue live on WhatsApp, auto-replies 24/7, loyalty, discounts, payment links on your own gateway, and an order + customer inbox. Listed on the Scanly directory.

AED 99/mo + 3% per order · AED 199 one-time setup (we build your catalogue and connect WhatsApp).
